

JEPA: a short snippet should predict the whole window

Local views are pulled toward the average of global views – in latent space, not pixel space.

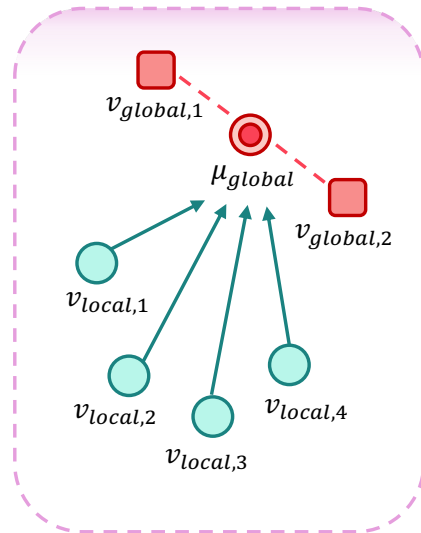

Raw EEG Window

Similarity Prediction Loss

Latent Space Evolution

LuMamba
Pre-training

$$\mathcal{L}_{LeJEPa} = \frac{1}{N_{local}} \sum_{i=1}^{N_{local}} \|\mu_{global} - v_{local,i}\|_2^2, \text{ with } \mu_{global} = \frac{1}{N_{global}} \sum_{j=1}^{N_{global}} v_{global,j}.$$

$N_{global} = 2 \text{ and } N_{local} = 4.$
